Executive Summary

- Innovative Concepts began in 1999 out of New Zealand;
- Technology focused company hiring only the best people, we strive for our customers make the impossible possible; and
- The goal is to create a long-term partnership, where growth is a combined effort.

Company Background in Thailand

- Registered under 'IConcepts Co., Ltd.' in Thailand in Sep 2003
- Achievements
 - Winner of Thailand ICT Award year 2005 and year 2007
 - Microsoft Certified Professional (MCP) developers
 - Microsoft Certified Partner
 - Candidate for CMMI 3
 - Large site references
- Business purposes:
 - Large scale software development and integration services with partner focus
 - To sell in-house software
- Current products in Thailand:
 - National Security Biometric Fingerprint
 - Large-scale Enterprise Fingerprint Matching System
 - Configuration Management Implementation
 - System Integration
 - System Integration

Area of Expertise

Capabilities

We specialize in developing end to end enterprise solutions for the entire software lifecycle; ranging from business requirement gathering to full system end to end testing.

Development Platform

- Microsoft .NET applications
- PHP, JSP, ASP web applications
- Java applications

Software Development

- Enterprise software
- Client Server
- Fat Client
- Web based applications

LiveScan4ALL

ซอฟต์แวร์สำหรับเทคโนโลยี ที่ได้รับการรับรอง
จากแอปเปิลไอโอเอสและแอนดรอยด์

ซอฟต์แวร์ "ระบบสแกนนิ้วมือ" ซึ่งเป็นเทคโนโลยีล่าสุดที่ ได้รับการรับรองจากแอปเปิลไอโอเอสและแอนดรอยด์ โดยสามารถใช้งานได้ทั้งบนคอมพิวเตอร์และบนมือถือ

"เราภูมิใจที่ได้" เป็นผลิตภัณฑ์แรกๆ ในการเปิดตัวของระบบสแกนนิ้วมือ "LiveScan4ALL" ที่มีทั้งบนคอมพิวเตอร์และบนมือถือ และได้รับการรับรองจากแอปเปิลไอโอเอสและแอนดรอยด์

ผู้ผลิต ระบบสแกนนิ้วมือที่ใช้เทคโนโลยีการสแกนลายนิ้วมือที่ทันสมัยที่สุดและมีความปลอดภัยสูงที่สุด

LiveScan4ALL เป็นผลิตภัณฑ์แรกๆ ในการเปิดตัวของระบบสแกนนิ้วมือ "LiveScan4ALL" ที่มีทั้งบนคอมพิวเตอร์และบนมือถือ และได้รับการรับรองจากแอปเปิลไอโอเอสและแอนดรอยด์

NEC PARTNERS WITH BIOMETRICS4ALL TO DELIVER TOTAL IDENTIFICATION SOLUTION FOR STATE AND LOCAL AGENCIES

RANCHO CORDOVA, Calif., April 9, 2007 - NEC Corporation of America, a premier provider of IT, network, and identity management solutions, together with Biometrics4ALL, a leading multi-biometrics technology company, today announced the introduction of the LiveScan product family, state-of-the-art technology to meet civil and law enforcement identification demands. The collaboration with Biometrics4ALL enables NEC to offer a fast and accurate end-to-end solution, from identification to booking.

"As a leading provider of biometric identity solutions, NEC is continually focused on providing our customers with unparalleled matching technology, and identification accuracy," said Barry Fisher, vice president, Identification Solutions, NEC Corporation of America. "This partnership with Biometrics4ALL represents another milestone in providing state and local agencies the tools they need to provide efficient and effective identification solutions. Together we will leverage our proven technology to provide agencies with a streamlined solution for fast and accurate ID verification."

The LiveScan products offer the latest in biometrics technology, providing the ability to dynamically set data interchanges and business rules quickly attain FBI certifications and adapt to new scanner hardware. In addition, the products provide immediate NFIQ (National Institute of Standards and Technology Fingerprint Image Quality) rating feedback with Reason Management™, and switch seamlessly into multiple

- Our Core Team Members

Our Methodology

Rapid Delivery Framework

- Proven toolsets allowing the project manager to be successful;
- Identify clear roles and responsibilities to ensure success;
- Identify / track / manage deliverables;
- Provide clear and transparent project status / velocity;
- Full code and documentation traceability;
- Focus on quality and process driven delivery; and
- Incorporate quality processes such as Six Sigma and CMM Level 5.

Our Methodology

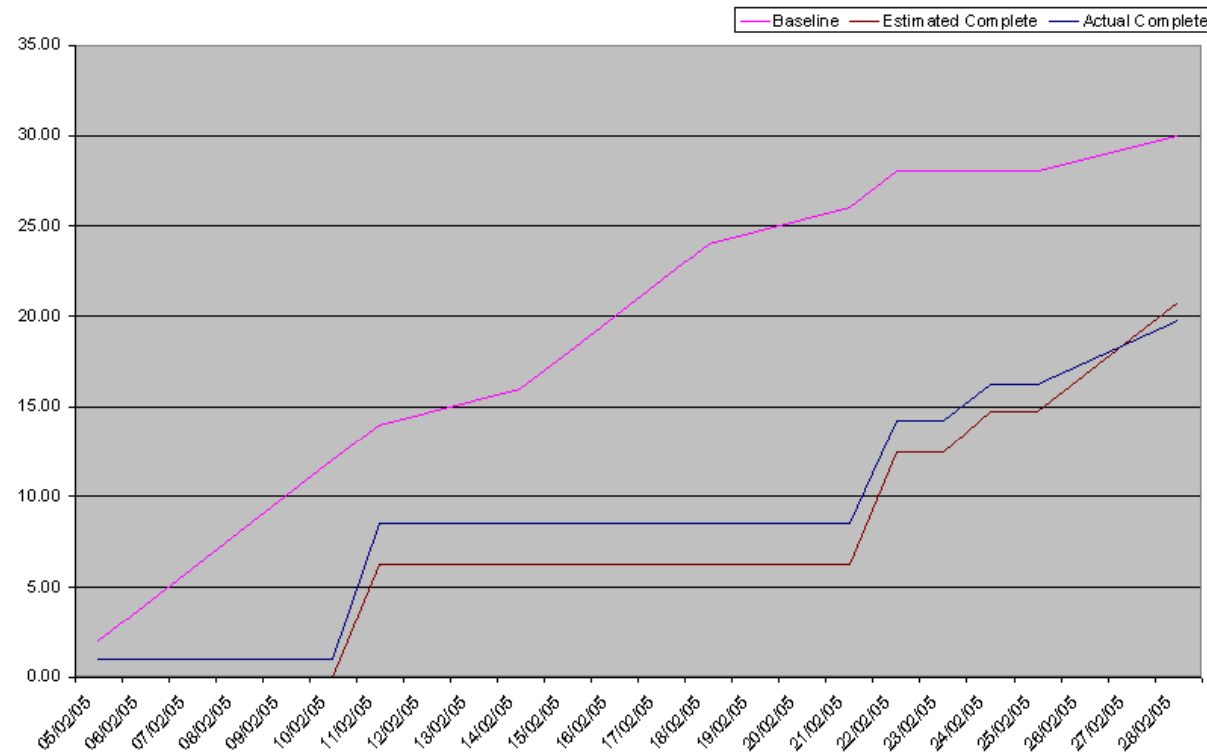

The Wall

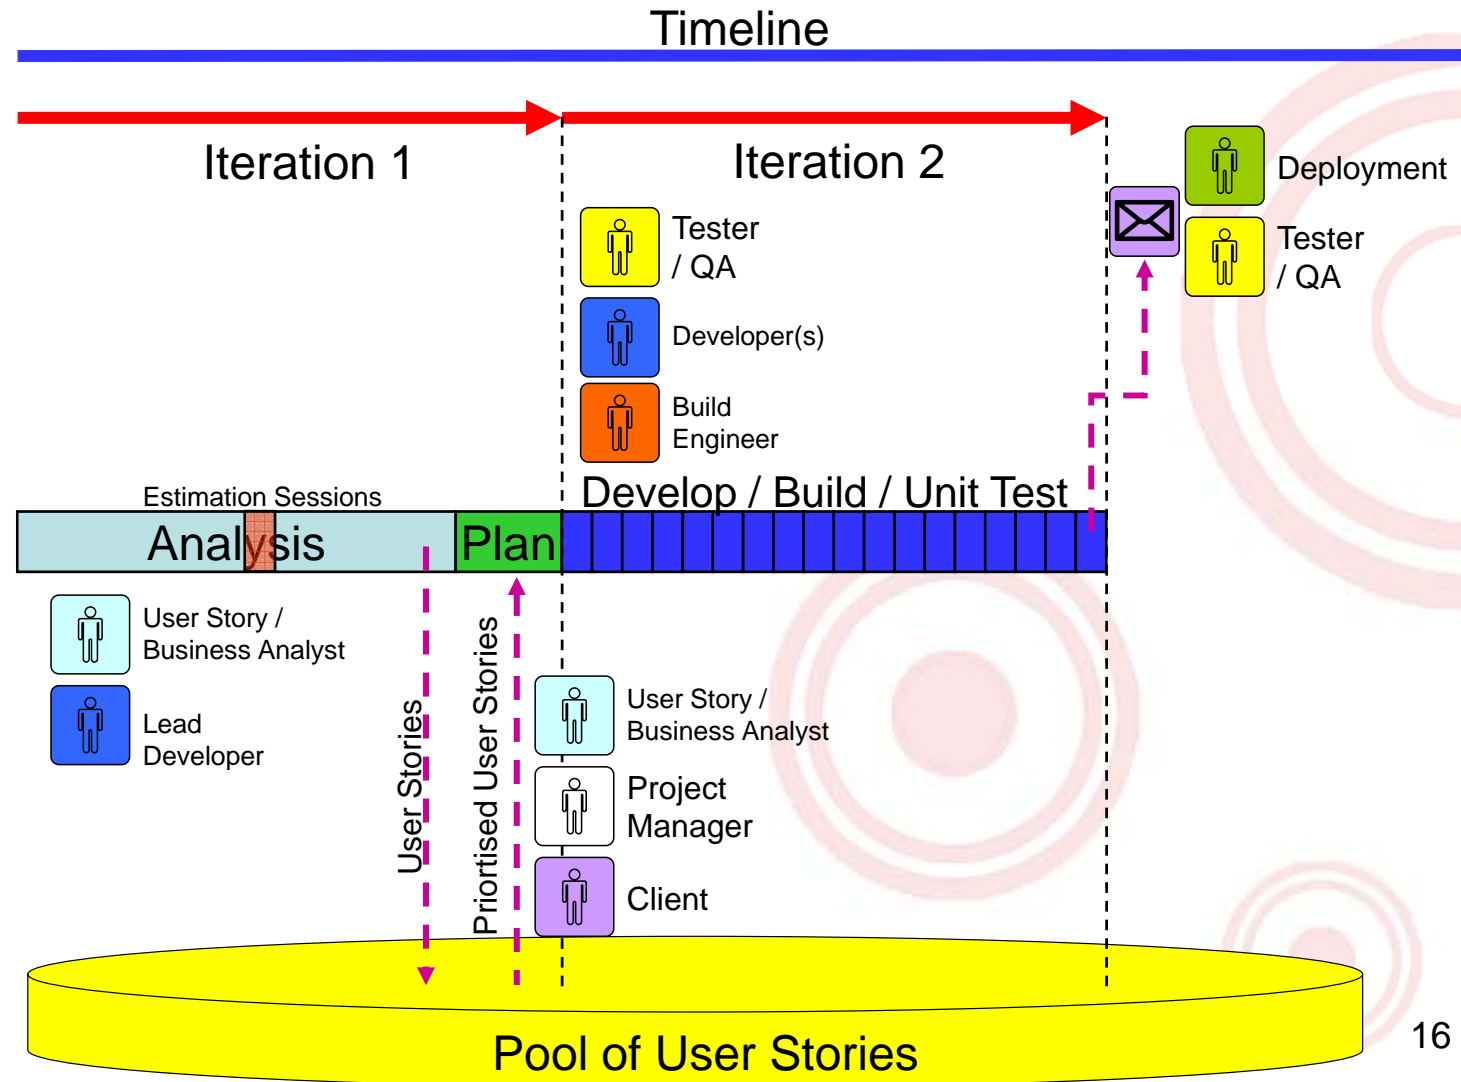

Our Methodology

The methodology provides us:

- Software development full traceability of work per area/ per developer/per day
- Benefits in manage quality of work with unit test and integrated testing on daily basis
- Fully visibility of software progress and encountered problems

Michael Chen

Technical Director

- Michael Chen has over 8 years of working experience working in the Information Technology field. He specialty is large enterprise architecture and software development methodology. Michael has been flown all over the world to teach teams on the software development implementation.
- His experience includes:
 - Project management of large scale project implementations.
 - Software development methodology implementations.
 - Enterprise architecture design and implementation.
 - Data Center Infrastructure architecture design and implementation.
 - Telecommunication industry.

Nattida Sanguansin

Sales and Marketing Director

- Nattida has over 6 years of working experience working in the Information Technology and Financial field. Her experience including working for GE Capital in their prestige's Six Sigma department. She is highly regarded as one of the best in this field and have saved companies well in excess of 200 million Baht.
- Her experience includes:
 - Project management of large scale project implementations.
 - Full business end to end and UAT testing.
 - Project design and improvement based upon Six Sigma.
 - Sales and Marketing .

Manit Intrarapim

Project Manager

- Manit is an experienced hand with over 15 years of IT experience. His areas of expertise include both ERP software development and system administration with focus on the system security. He is responsible for corporate IT infrastructure projects and leading software development teams.
- His experience includes:
 - Project management of large scale project implementations
 - Hand-on experience in software development
 - End-to-end software development lift cycle
 - Corporate IT Infrastructure
 - Network Environment and Tools

Phichet Trisiripisal

Project Manager

- Phichet Trisiripisal has over 7 years of experience in object-oriented programming (OOP) design. He has conducted research in image compression, image segmentation and object recognition.
- His experience includes:
 - 3D computer graphics transformation and matrix.
 - Image triangulation with half-edge technology. (Image segmentation and eye detection)
 - Bioinformatics (Protein database).
 - Runway tracking system for semi-automatic aircraft landing system.
 - Computer vision system for retrieving 3D information from image scenes.
 - Face detection and optical character recognition (OCR).
